Arm-O-Bunk®

With Organizers

19793GRN/MB

A sleep solution for the toughest conditions.

The expeditionary bunkable cot system was specifically developed to address troop needs in rapid deployment situations. What we came up with is a bunkable solution that sleeps two in the space of one. The innovative compact design maximizes not only sleeping space but shipping space, too, for logistical ease. Its supportive sleeping deck with no mid-beam is comfortable without the need for a mattress.

- **Space Available.** **Disc-O-Bed®**'s versatility allows warfighters to make the most of limited space with a stackable bunk configuration plus organizing storage in one. Think naval ships, aircraft alert shelters, transient lodging, LP-Ops, and FOBs. Available in all services' supply systems.

- **Packs Small.** Compact and stores flat in 2 carry bags and together in its own outer transport carry bag for efficient shipping, warehousing and Tricon storage.

- **Weight Tolerance.** **Disc-O-Bed®**'s steel and durable canvas construction is designed to support the warfighter and all his/her gear up to 272kg - per single cot - with no problem.

- **Proven Tough.** Battle tested and army strong. We're proud to be the field-proven, temporary sleep solution supplier for Operation Iraqi Freedom and Operation Enduring Freedom. (NSN #7105-01-554-7405).

- **Comfort When Needed Most.** Not only does the **Disc-O-Bed®** stay strong through the entire battle, it can also be customized with add on accessories so to maximize overall comfort and storage. Accessories available include a mosquito net and frame, footlocker, side cabinet and more.

SPECIFICATIONS

- Frame** • Beige, powder coated, anti-rust steel
- Fabric** • Olive Green 900D polyester, PU coated
- Outer Bag** • Olive Green 600D polyester, water resistant
