Disc-Bed 19803

Ready to serve a variety of medical and relief environments

It's been said that disaster operations are all about logistics. Disc-Bed makes rapid deployment easy for mass care and sheltering. It ships flat and sets up quickly with no tools. Its compact footprint allows you to assist more displaced persons in less space. With no annoying mid-bar, Disc-Bed was designed with hygiene and comfort in mind for patients, volunteers and the overall disaster area in mind.

- **Space-Saving.** Disc-O-Bed®'s lightweight, completely collapsible design means our cots ship virtually flat to fit more per container.
- **Comfort Mobility.** In an emergency situation, you need a product that works just as hard as you do. Disc-O-Bed® is a portable, comfortable sleep solution engineered with a weight tolerance of 500lbs (227kg), without requiring a mid-beam for support.
- **Extremely tough for extreme situations.** Response time is critical. You need a product that's convenient for everyone to use – and easy enough for any volunteer to put together. Disc-O-Bed®'s user-friendly design features a simple, no-tool assembly for quick set-up.
- **Hygienic Help.** Disc-O-Bed®'s 600-denier polyester sleeping deck is comfortable, mildew and stain resistant. With a waterproof backing it offers overall firm support without the need for a mattress.
- **Replaceable Parts.** We understand the challenges of conducting a large-scale operation. Disc-O-Bed®'s versatile, modular design makes it easy. Simply replace a lost part anytime without having to replace the entire cot.
- **Load Up.** Add on accessories available include IV stand, side organizer, mosquito net and frame.
