# Cholera-Bed

Providing comfortable care to the ones that need it most.

The Cholera-Bed is a solution for the toughest of conditions and proven effective for helping patients in outbreak situations. Designed specifically to handle the extremes of disaster relief, it has been used extensively in Cholera and Ebola response efforts across the globe.

- **Ultra-Hygienic.** Cholera-Bed's ultrasonically welded mat features a 20cm diameter cut out hole, and is thick and comfortable to ensure maximum patient hygiene by having no thread or sew lines.
- **Wash Effortlessly.** For quick in field sanitization, the mat is completely impermeable and waterproof and can be sprayed or dipped into chlorine solutions mixed according to regulatory standards.
- **Robust and Compact.** Disc-O-Bed®'s patented modular design enables a quick, tool free assembly. Simply disassemble and store compactly in the included zippered carry bag.
- **Long Lasting and Adaptable.** Replace any single part without having to replace the entire cot. Add-ons like an IV stand or mosquito net and frame are also available for extra customization.
- **Tried and Tested.** The Cholera-Bed is CPSIA compliant and CE Certified.

\*Bucket not included
